The following is an examiner's statement of reasons for allowance: Moriyama '396 and '856 do not suggest "metal" organosulfur cis to trans catalysts or >32% trans conversion. Higuchi '028 does show cores containing metal organosulfur compounds, but the examiner cannot predict if these cores would have the required trans gradient or high trans conversion. The obviousness double patenting over 6465578 is withdrawn because its claims do not mention a trans gradient, urethane covers or casted covers, the MW of the polybutadiene, amounts of free radical source etc. It would be unreasonable to look back to the specification to provide all of these limitations simultaneously. The terminal disclaimer overcomes the other obviousness double patenting rejections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
